**MEMORANDUM OF UNDERSTANDING****Reference: Mindscape Innovations to serve as LEED for Homes "Provider Agent" for Alliance for Environmental Sustainability in Ontario**

Alliance for Environmental Sustainability (AES) and Mindscape Innovations (Mindscape) hereby declare their intent to work cooperatively to deliver LEED for Homes certification services in the Canadian Province of Ontario.

AES is one of 12 organizations currently registered with the United States Green Building Council (USGBC) as a Provider of the LEED for Homes rating system, and which can offer certification services to residential builders who wish to certify homes under that system. There are no such Providers in Canada currently, but there are many builders in Canada who are interested in the LEED for Homes rating system. The USGBC is in the process of expanding the LEED for Homes program, and is expected to add a minimum of four or five Providers in Canada within the coming months.

Mindscape has been working with several of the leading Builders in Ontario over the past year, and is involved with several current LEED for Homes projects, including the first Canadian home that was successfully certified under the LEED for Homes program: 162 Goodwin Dr, in Guelph Ontario, constructed by Reid's Heritage Homes, and awarded the highest achievement level of Platinum. Mindscape has been establishing a network of companies to offer rating services for LEED built homes throughout the Province of Ontario, and intends to apply to the USGBC to become a Provider in Ontario.

AES has agreed to act as a Provider on Mindscape's projects. To that end, AES hereby accepts and declares Mindscape as its "Provider Agent" in Ontario, thus enabling Mindscape to offer LEED for Homes certification services in Ontario with support from AES.

AES and Mindscape are pleased to announce their cooperative relationship, and look forward to jointly delivering LEED for Homes certifications to Ontario's home builders.
